

Range of Enclosures

Overview

KRONE's range of enclosures

Connection enclosures for outdoor and indoor applications

Indoor and outdoor distributors are used, according to the application, in the topology of local telecommunications distribution networks. The extensive range of KRONE enclosures offer not only excellent protection against environmental influences but, in the case of outdoor enclosures also a long service life even under the most adverse conditions. The range also provides many indoor technical applications some of which are described in this chapter.

Contents of this chapter

- 13.0 Overview
- 13.1 Product range
- 13.2 Mini distributor for up to 30 pairs (wall-mounted applications only)
- 13.3 KRONECTION Box for up to 100 pairs (for wall-mounted and flush-mounted applications)
- 13.4 Compact distributor for up to 200 pairs (wall-mounted applications only)
- 13.5 Compact distributor for up to 300 pairs (for wall-mounted and flush-mounted applications)
- 13.6 Wall-mounted cabinet for up to 2000 pairs
- 13.7 Free-standing cabinet for up to 3500 pairs
- 13.8 Wall-mounted distribution rack for up to 3500 pairs
